

Cold weather may ruin backyard fun, but it shouldn't ruin your water. Whether you completely cover your pool or simply reduce maintenance, BioGuard's winterizing products will get you through the cooler months so that starting up again is a breeze.

Old Man Winter isn't so scary after all.

Prevent a slimy surprise in the spring with algae preventative products like Arctic Blue® Algae Protector™ and Winter Algaecide. Effectively oxidize and clarify with Arctic Blue Shock or Winter Shock II. Use the BioGuard® Arctic Blue Winter Kit to make pool closing and off-season pool care as simple as possible.

Winterizing is the most important thing you can do to make your spring pool opening as easy as possible. There are enormous benefits to correctly closing your pool, including:

- Protecting your pool surfaces and equipment.
- Keeping water looking its best all winter long.
- Protecting equipment from freeze damage.
- Saving money on extra maintenance when you open your pool.

Visit us for tips and advice on winterizing your pool.

PRE-CLOSING CHECKLIST

Customers please complete the following checklist the day prior to closing:

- Bring a water sample in for testing so your pool water will be balanced prior to closing.
- Use BioGuard Balance Pak® 200 for raising your pH, and BioGuard Balance Pak 100 for alkalinity. Clean tile and water line to remove build-up from the summer with Off The Wall®. Use Strip Kwik® and/or Kleen It® to remove contaminants & debris from your filter prior to closing.
- Keep pool/spa equipment running if outside temperature drops below 40° F to prevent freeze damage.
- Do not install the winter cover before the pool is winterized.
- Remove auto cleaner and store as per directions in owners manual.
- Remove solar cover and protect during the winter by cleaning with BioGuard Stow-Away®.
- If applicable, have winter cover and water bags outside near the pool/spa area.
- Water is pumped off auto covers.

Suggestions that better your chance of a cleaner pool upon opening:

- Periodically check water level and water clarity through winter and spring (especially with autocovers).
- Kill algae if present, with BioGuard's Banish®.
- Thoroughly brush walls, stairs and bottom of pool/spa with BioGuard's full line of handheld pool cleaning accessories.
- Vacuum out all debris and remove all leaves.
- Clean out all pump and skimmer baskets.
- Bring water sample to us to ensure proper water chemistry and receive free a personalized BioGuard water analysis.
- Keep water pumped off covers.
- If we will be closing your pool, please complete the checklist prior to our arrival.
- Contact us in the Spring to schedule any repairs noted at the time of closing.
